Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Danielson asserts the claimed "a frame transmitter" includes "a transmitter buffer" that transceives frame to/from buffer interface/network, respectively, is a distinct features. Examiner respectfully disagrees and asserts the Hioe et al patent clearly reads on it. Hioe et al patent, Figure 3 discloses a modulation section (203) (corresponding to "frame transmitter") having RF-module 310, IF-module 308 and BB-module 306. Each of the module has a buffer (corresponding to the disputed limitation). Examiner advises Mr. Danielson to discuss with the inventor to further amend the claimed invention to place the application in a favorable condition for allowance. Upon receiving a response, everything will be considered in light of the subject matters discussed during the interview. No agreement was reached! .
